

EYELINER//EYEBROWS/POST-PROCEDURE INSTRUCTIONS

Post operatory instructions are provided for your benefit to insure the best possible results. Should you choose to ignore the instructional information provided to you, Michelle Keith is not responsible for any complications such as: rashes, infections, and doctor's appointments, lost wages from work, loss of color, fever blisters, or scarring.

Should you choose to ignore these directions, any additional visits beyond the agreed visit will be an additional charge. Like any elective procedure, the after care is YOUR responsibility. **Tap** your ointment on with a Q-tip, do not use any back and forth motion this will cause the pigment to loosen before it is healed.

IMMEDIATELY FOLLOWING PERMANENT MAKEUP PROCEDURE:

- *You will need to flush the eyes with your eyewash MINIMUM OF TWICE the first day and minimum of twice the second day after the procedure. Make sure you have your ointment on your eyes when you flush.
- *After the procedure, apply pressure to **the brows** for 1 hour to stop any bleeding you may have (20 seconds pressure every 15min.)
- *No ice directly on the **eyes or brows**. (pulls pigment from the area), just around the eye and brow area.
- *Extra strength Tylenol can be used for the sunburn feeling (as directed).
- ***Keep a thin layer of Bacitracin ointment on the eyes, brows until they completely flake/peel.**
- ***Apply the ointment morning, noon and night.**
- *Absolutely NO SCRUBBING the area. Allow it to flake off on its own.
- *Absolutely no soaps, cleansing creams, or chemicals on the area. Wash your face carefully avoiding the area or areas for 5 days. Avoid the sun and tanning beds for seven (7) days.
- *Do not stand in front of a hot shower and let the water hit your face. Avoid water on the new pigmented areas as much as possible, the First Five days. (when showering, washing face, etc. have ointment on the pigmented area to protect the from water).
- *After the brows and eyeliner flake/peel you may start applying your make-up to the brow and eye areas.

FAILURE TO FOLLOW PRE OR POST-TREATMENT INSTRUCTIONS MAY CAUSE LOSS OF PIGMENT DISCOLORATION OR INFECTION.

PERMANENT MAKEUP is a cosmetic procedure that may enhance the appearance of the skin, but it is not designed nor is capable of producing perfect results. A perfect result is not guaranteed or warranted. I certify that I can read and write, and that I have read the information in this instruction sheet and fully understand it. I have had an opportunity to ask any questions I might have. I certify that I will abide by all the directions herein, and I certify that I have received a copy of this instruction sheet. QUESTIONS OR PROBLEMS? Call (405) 691-9992.

Thank You Michelle
